

SolidDrives UK Price List 2009 (including vat)

<u>Model</u>	<u>Description</u>	<u>Quantity</u>	<u>Cost</u>
SD1 SolidDrive	SolidDrive SD1: attachable to drywall and similar surfaces. Includes one (1) SolidDrive SD1, plenum-rated wiring with Eurostyle connector. Each SolidDrive SD1 is designed for one channel of audio. NOTE: Mounting bracket required, please see below. Optional equalization module listed below.	Each	£379.99
SD1g SolidDrive	SolidDrive SD1g: attachable to glass and other non-porous surfaces. Includes one (1) SolidDrive SD1g, semi-transparent wiring with Eurostyle connector, and double-sided adhesive disc. Each SolidDrive SD1g is designed for one channel of audio. NOTE: Optional equalization module listed below.	Each	£379.99
SD1sm SolidDrive	SolidDrive SD1sm: attachable to wood and similar surfaces. Includes one (1) SolidDrive SD1sm and plenum-rated wiring with Eurostyle connector. Each SolidDrive SD1sm is designed for one channel of audio. NOTE: Optional equalization module listed below.	Each	£379.99
SD1 Desktop SolidDrive Kit	Portable SolidDrive SD1 Desktop: for use on top of horizontal surfaces including glass, granite, metal, wood, ceramics, laminates, and composites. Special silicone rubber pad "grips" any non-porous surface. Kit includes one (1) SolidDrive SD1 Desktop, DC power adapter, mini amplifier, equalization module, cables, carrying case, and instructions.	Kit	£479.99
Passive Equalization Module	Passive Equalization Modules are designed to optimize the frequency response of the SolidDrive SD1, SolidDrive SD1g, and SolidDrive SD1sm for the type of surface to which they will be attached. One module is needed for each SolidDrive SD1 or SolidDrive SD1g (included with the SD1 Desktop Kit).	Each	£28.99
Mounting Bracket	Acoustic mounting bracket for SD1.	Each	£19.99
TD-230 Stereo Amplifier	Compact specially designed amplifier rated at 30 watts per channel. Includes 24V DC power supply, installation hardware and instructions.	Each	£549.99
SW7.iw In-Wall Subwoofer	In-wall subwoofer has dual voice coil 7" woofer with mica/graphite cone and an MDF enclosure that mounts behind walls between wall studs. It is precisely tuned and provides appropriate air volume to deliver outstanding quality bass. The SW7.iw is moisture resistant and can be installed anywhere including kitchens, bathrooms, and indoor pool and spa areas. Comes with driver mounted in the MDF enclosure ready for installation, is neatly concealed from sight when installed, and includes white metal return air register (paintable).		
	SW7.iwa active version (sealed enclosure) with A4 Amplifier	Each	£499.99
	SW7.iwa active version (sealed enclosure) without A4 Amplifier *	Each	£199.99
	SW7.iwp passive version (ported enclosure) without A4 Amplifier **	Each	£199.99
SW8.iw In-Wall Subwoofer	In-wall subwoofer has dual 8" woofers with mica/graphite polypropylene cones and sealed enclosure that mounts behind walls between wall studs. It is precisely tuned and provides appropriate air volume to deliver clean, defined bass. The SW8.iw is moisture resistant and can be installed anywhere including kitchens, bathrooms, and prior to indoor pool and spa areas. Drivers come in a separate baffle that easily attaches to the MDF enclosure. The SW8.iw is neatly concealed from sight when installed and includes soft white perforated metal grille (paintable).		
	SW8.iw with A4 Amplifier	Each	£769.99
	SW8.iw without A4 Amplifier *	Each	£469.99

* Multiple subwoofers of the same model can be utilized with a single A4 amplifier.

** The passive version has a ported enclosure and is designed to be connected to the same amplifier as the SolidDrive . It contains dual 8-ohm voice coils, subwoofer level attenuator, and built-in dual low pass crossover matched to the SolidDrive
